

Tiger Shark

TIGER SHARK CAMERA

The Tiger Shark camera is based on the SDS1210 stills camera with its proven track record for high quality subsea images. Quality and user friendliness is taken to a new level with this subsea digital stills camera.

The Tiger Shark camera is perfect for ROV usage or as a high resolution stand-alone camera for research purposes. Intergrated flash and Ethernet control with download capabilities. Timer function and red dot laser for referencing can also be added features.
